# Vietnam Cold Chain Logistics Market – Industry Trends

Vietnam cold chain logistics market size is projected to grow at a CAGR of 12.24% during the forecast period between 2023 and 2029.

The Vietnam cold chain logistics market is growing due to an increasing demand for fresh and frozen foods and beverages, rising demand for pharmaceuticals, vaccines, and healthcare products that require temperature-controlled transportation and storage is also contributing to the growth. Also, the growth of e-commerce and online grocery delivery services is fuelling demand for cold chain logistics.
