LEVIS MANUFACTURER

About us

LEVIS MANUFACTURER is specialized in design, manufacturing, installation and maintaining generators.

With over 15 years dealing with generators, we commit to supply the best power solution to customers

OMEGA Power Systems is the standby Generators supplied by our company, LEVIS MANUFACTURER, with the range of capacity from 2KVA to 2,500KVA. With orders for large capacity, our company will offer the synchronizing solution which enables the capacity used up to 20,000KVA. Generators branded OMEGA Power Systems are perfectly designed and produced by advance technology line, which makes our products suitable for markets all over the world. Especially, we can design and manufacture according to specific request of customers.

Generators branded OMEGA Power Systems are made from world leading engine and alternator brands. We offer a special warranty period which is 1,5 longer than that of similar products in the markets. Spare parts are always available to meet the demand of customer promptly. We offer the training program at our factory for each three months to all our Agents and customers using OMEGA Power Systems products at our factory

Our vision

When your power needs are more challenging than normal specifications, OMEGA's Solutions Department is dedicated to providing bespoke solutions to meet the unique needs of each customer on a project-by-project basis..

Product updating and optimization is essential for OMEGA to move forward. We are dedicated to establishing a product innovation process ranging from product planning, product development to product optimization based on our scientific analysis on market changes, timely access to industry information and good understanding of user needs.
